

Electricity activity booklet

Let's learn about electricity in your classroom and at home! It's important to understand what we use electricity for, so we can make smart choices.

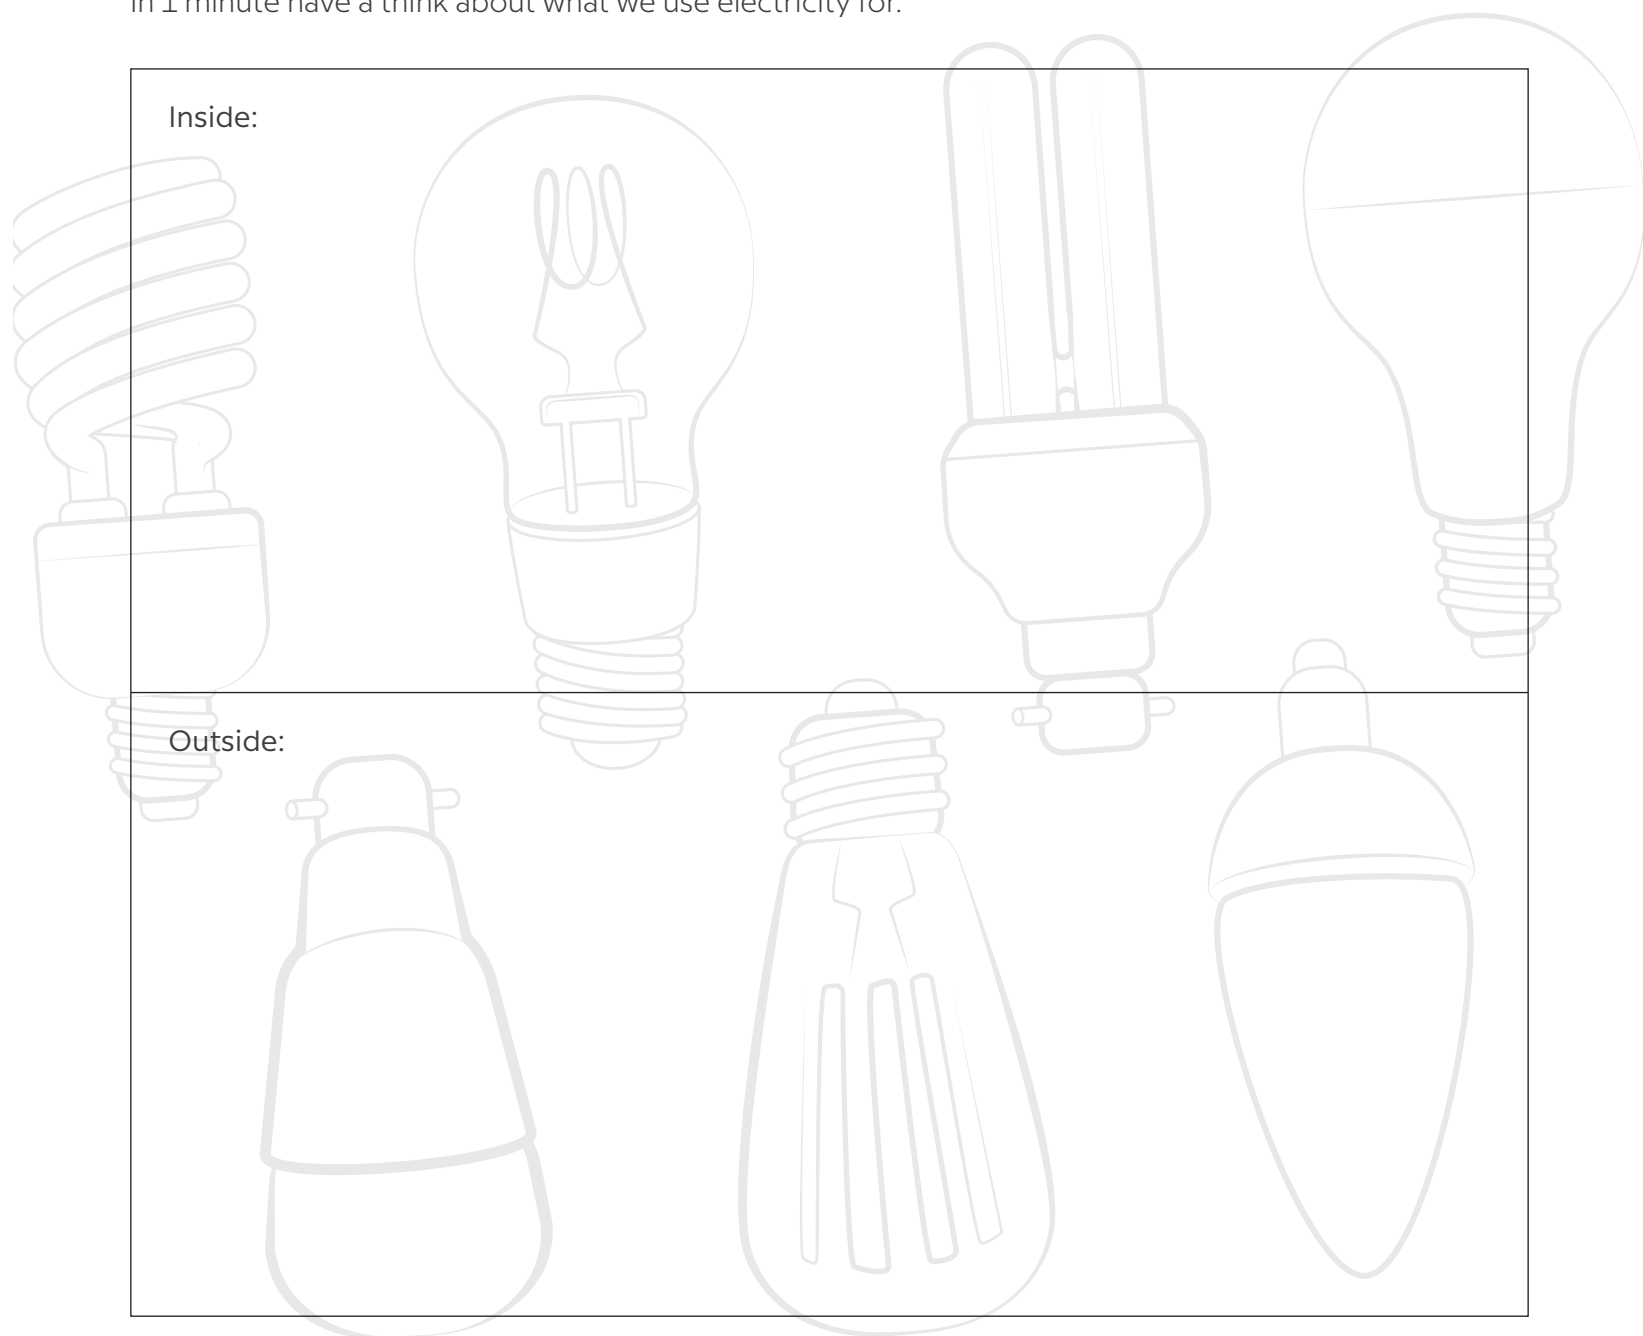

The less electricity we use, the more our planet benefits!

ACTIVITY 1:

In 1 minute have a think about what we use electricity for.

Inside:

Outside:

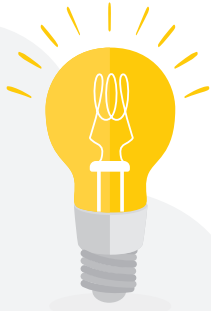

ACTIVITY 2:

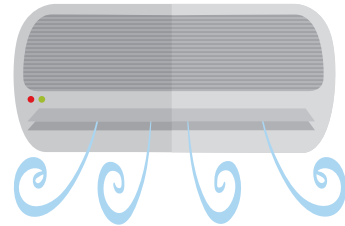

How many of the following can you see in your classroom?
Have a look around, see how many you can count and write the number in the circle.

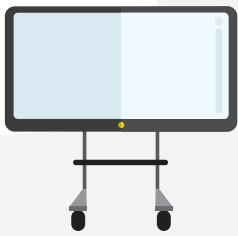

energy efficient
light bulbs

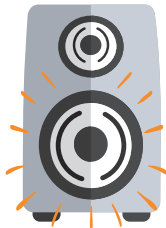

light bulbs

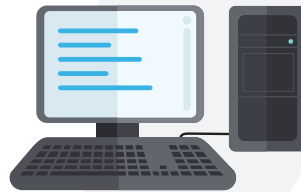

aircons

smartboards

speakers

computers

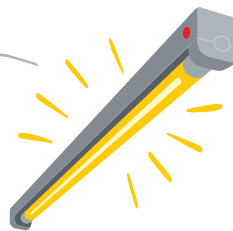

desk phones

printers

ceiling fans

fluoro strip lights

fridges

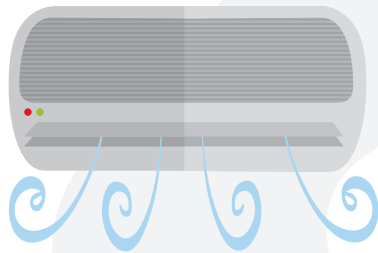

Is there anything else you can spot? Draw a picture.

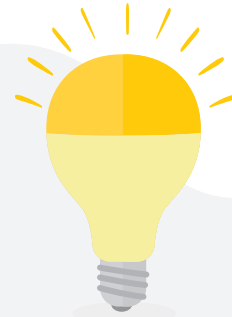

ACTIVITY 3:

Now it's time to think about what uses the most electricity in your home. What do you think might use the most?

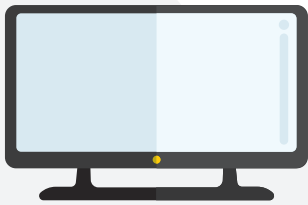

Number the following from 1-10

aircon

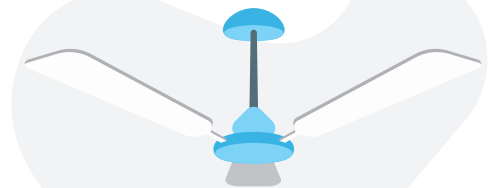

LED lightbulb

TV

dishwasher

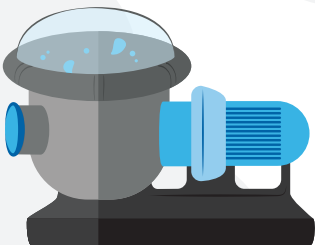

ceiling fan

fluoro strip light

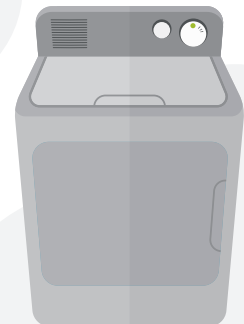

fridge

pool pump

washing machine

clothes dryer

ACTIVITY 4:

What can we do to help save energy?
